Portfolio: <https://marwan-el-fakharany.marwan-elfakharany1.chatgpt.site>

Fullstack developer and networking & cybersecurity student with experience delivering two live websites end to end. Build responsive interfaces, backend features, integrations, and deployment for real businesses. Open to client work and remote opportunities.

EXPERIENCE

Fullstack Developer | Droppin EG | Jul 2024 - Present

- Built the logistics startup website end to end with React, Node.js, and MySQL, including shipment tracking and admin workflows.
- Developed the startup's Shopify app and deployed web systems on AWS and GCP.
- Maintained application functionality and addressed security issues in production.

Website Developer | Salakawy Coaching | Client project

- Designed and built the complete online coaching website, from frontend to backend and integrations.
- Created package discovery, transformation galleries, a calorie calculator, and an AI assistant to help visitors choose a service.

AI Development Intern | Elsewedy Digital | Jul - Sep 2025

- Helped develop the "Ask HR" assistant and worked with open-source models on company GPU infrastructure.

SELECTED PROJECT

TimeKeeper | Python desktop application

- Built authenticated session tracking and activity-time logging with SHA-256 hashes for stored records.

SKILLS

Web & backend

- React, Node.js, MySQL, JavaScript, Python, Git/GitHub, Shopify app development.

Systems & deployment

- Linux, AWS, GCP, basic networking and security practices.

EDUCATION & TRAINING

Elsewedy University of Technology | 2024 - 2028

- Networking & Cybersecurity degree, in progress.

Additional training

- CCNA coursework; Red Hat Linux System Administration basics; Cisco CCST exam passed (Nov 2024).
